

SIGNS AND SYMPTOMS

These signs and symptoms may indicate that a concussion has occurred.

SIGNS OBSERVED BY COACHING STAFF	SYMPTOMS REPORTED BY ATHLETE
Appears dazed or stunned	Headache or "pressure" in head
Is confused about assignment or position	Nausea or vomiting
Forgets sports plays	Balance problems or dizziness
Is unsure of game, score, or opponent	Double or blurry vision
Moves clumsily	Sensitivity to light
Answers questions slowly	Sensitivity to noise
Loses consciousness (even briefly)	Feeling sluggish, hazy, foggy, or groggy
Shows behavior or personality changes	Concentration or memory problems
Can't recall events prior to hit or fall	Confusion
Can't recall events after hit or fall	Does not "feel right"

ACTION PLAN

If you suspect that a player has a concussion, you should take the following steps:

1. Remove athlete from play.
2. Ensure athlete is evaluated by an appropriate health care professional. Do not try to judge the seriousness of the injury yourself.
3. Inform athlete's parents or guardians about the known or possible concussion and give them the fact sheet on concussion.
4. Allow athlete to return to play **only** with permission from an appropriate health care professional.

IMPORTANT PHONE NUMBERS

FILL IN THE NAME AND NUMBER OF YOUR LOCAL HOSPITAL(S) BELOW:

Hospital Name: _____

Hospital Phone: _____

Hospital Name: _____

Hospital Phone: _____

For immediate attention, CALL 911

If you think your athlete has sustained a concussion... take him/her out of play, and seek the advice of a health care professional experienced in evaluating for concussion.

Possible Concussion Notification For US Youth Soccer Events

US Youth Soccer and Staff want to make you aware that your son or daughter received a possible concussion during practice or competition and want to make you aware of this possibility and signs and symptoms that may arise which may require further evaluation and/or treatment.

It is common for a concussed child or young adult to have one or many concussion symptoms. There are four types of symptoms: physical, cognitive, emotional, and sleep.

If your daughter or son starts to show signs of these symptoms, or there any other symptoms you notice about the behavior or conduct of your son or daughter, you should consider seeking immediate medical attention:

- | | | |
|----------------------------------|-------------------|---------------------------------------|
| - Memory difficulties | - Neck pain | - Delicate to light or noise |
| - Headaches that worsen | - Odd behavior | - Repeats the same answer or question |
| - Vomiting | - Fatigued | - Slow reactions |
| - Focus issues | - Irregular sleep | - Irritability |
| - Seizures | Patterns | - Less responsive than usual |
| - Weakness/numbness in arms/legs | - Slurred speech | |

Please take the necessary precautions and seek a professional medical opinion before allowing your daughter or son to participate further. Until a professional medical opinion is provided, please consider the following guidelines:

- refraining from participation in any activities the day of, and the day after, the occurrence.
- refraining from taking any medicine unless (1) current medicine, prescribed or authorized, is permitted to be continued to be taken, and (2) any other medicine is *prescribed by a licensed health care professional*.
- refraining from cognitive activities requiring concentration cognitive activities such as TV, video games, computer work, and text messaging if they are causing symptoms.

If you are unclear and have questions about the above symptoms, please contact a medical doctor or doctor of osteopathy who specializes in concussion treatment and management.
